

Product Brief: NodeMonitor

Internode's NodeMonitor Service

NodeMonitor is Internode's solution for online performance monitoring of business networks. It provides a valuable management tool for our Internode Business Connect private IP wide area networks.

Two varieties of NodeMonitor are available; addressing customer needs for either 'at-a-glance' network status; or more in-depth traffic measurement and equipment configuration management services.

With sophisticated monitoring features, you can examine your network in real time or receive email alerts based on defined levels; the choice is yours!

The screenshot shows the NodeMonitor web interface. At the top, there are navigation tabs for NETWORK (with a 'Status' indicator), SECURITY (UNMANAGED), VOICE (UNMANAGED), and SERVER (UNMANAGED). The main heading is 'Network Status'. Below this is a table of devices with columns for Status, Device, IP, Location, Region, Last Changed, and Tools. The table lists several devices with their respective details.

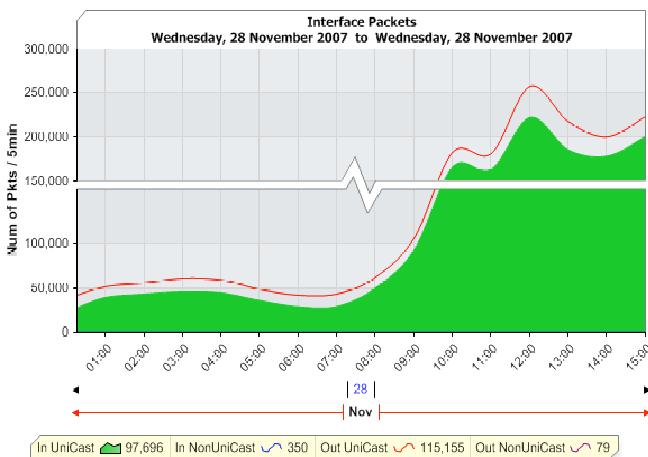

Status	Device	IP	Location	Region	Last Changed	Tools
Critical	Data Centre	192.168.244.7	ADL6 Colo - Rack X17 - Bay 1 (1/3 rack)	SA	7/15/2008 2:29:21 PM	Traceroute NMS Ping
Warning	Darwin	10.191.121.13	Panorama Ave Retail	NT	9/5/2008 7:01:39 AM	Traceroute NMS Ping
Normal	Brisbane	10.191.121.73	Jessica Ave Retail / Administration	QLD	9/4/2008 8:34:53 PM	Traceroute NMS Ping
Normal	Cammerlang	10.191.121.53	Queen Victoria St Retail	NSW	9/4/2008 2:41:03 PM	Traceroute NMS Ping
Normal	Dandenong	10.191.121.9	James Parade Distribution	VIC	9/4/2008 10:06:01 AM	Traceroute NMS Ping

Normal	West Hobart	10.191.121.221	Elizabeth Hwy Retail	TAS	7/15/2008 2:24:56 PM	Traceroute NMS Ping

NodeMonitor Basic

NodeMonitor Basic provides you with a quick assessment on the 'reachability' of all sites on your Internode Business Connect network. Statistics are continually gathered via pings, then processed and presented in a simple and ubiquitous overview of your network performance.

This service is included at no extra charge in conjunction with all Internode Business Connect networking solutions.

NodeMonitor Premium

NodeMonitor Premium performs a more detailed analysis of your network, combining router SNMP data with the ping results of NodeMonitor Basic. It's recommended for business-critical sites such as head office, distribution centre and data centres.

This service is included at no extra charge as part of our Internode Managed Equipment service. Internode Managed Equipment extends Internode Business Connect to a fully managed, 'LAN to LAN' service encompassing onsite routers, hosted firewalls and the IP network.

NodeMonitor Premium is also available as a standalone product when customers prefer to perform their own router management, or use the services of a third party systems integrator. In this case the monitoring service is available from \$50 per month per site.
