

Price List: NodePhone® VoIP

What Is It?

You've heard about people using Voice over IP (VoIP) Internet technology to make low cost phone calls? Well this is how you do it.

NodePhone® VoIP effectively turns the whole of Australia into a local call zone, allowing you to make untimed calls to any fixed phone in the country over your Internode broadband service. It enables you to call and communicate with friends, colleagues and others - whether those people are also using NodePhone, or using a conventional telephone service – and of course they can call you too.

Setup Options

There's **no setup charge** for a basic NodePhone VoIP service with a single new telephone number. Choose a number that's local to where you live – from any of the more than 2,000 local calling zones across Australia.

- However if you wish to move an existing telephone number to NodePhone VoIP, a once-off \$29.95 number porting charge applies.

Equipment Requirements

You'll need approved hardware to use a NodePhone VoIP service - such as the Gigaset DECT/IP phone system; or integrated VoIP router solutions from Billion and FRITZ!Box.

- Our VoIP Hardware page describes each these options – www.internode.on.net/nodephone/hardware

Monthly Plans

Boost your savings with our generous inclusion of monthly call credits:

Plan Name	Monthly Rental	Included Monthly Call Credit
NodePhone2-Starter	\$5.00 [†]	\$10.00
NodePhone2-Value	\$10.00 [†]	\$20.00
NodePhone2-Premium	\$20.00 [†]	\$40.00

[†] **Total Minimum Price** information is documented at the end of this pricelist. Please refer to our website for complete terms and conditions – www.internode.on.net/nodephone.

Call Rates

Call Type	Description	Call Cost
NodePhone	Calls to another NodePhone service	Free!
Local	Calls to any standard fixed line telephone service in your local area	18 cents untimed
National	Calls to any standard fixed line telephone service in Australia	18 cents untimed
Mobile ^{NOTE 1}	Calls to any standard mobile phone service in Australia	No flagfall + 29 cents per minute
International ^{NOTES 1&2}	Calls to any phone service outside of Australia	15 cent flagfall + from 5 cents per minute

NOTE 1 : Timed charges for Mobile and International calls are assessed on a per second basis, with a minimum assessed duration of one minute.

NOTE 2 : The International rates vary depending on the country/destination you are calling.

- You'll find most popular destinations - including all standard fixed line telephones in New Zealand, United Kingdom, USA, Canada, China, Hong Kong, Malaysia, Singapore, Taiwan, Thailand, Ireland, Greece & Italy - are just 5 cents per minute (plus a 15 cent flagfall).
- You can check the rate of any other international destination at our website.

Price List: NodePhone® VoIP

Features

Free Setup & No Long Term Contract - There's no charge to set-up a NodePhone account; and no long term contracts to worry about.

Includes Caller ID and Voicemail - Enjoy Calling Line Identification ('caller ID') and a sophisticated voicemail system including the option of voicemail as email – with **no usage charges** - and at **no additional cost**.

Cost Effective - With very attractive call rates, including 18 cents untimed to any standard fixed phone in Australia, you could be saving real money off your traditional phone bill. You'll find these savings **amplified** with our generous inclusion of monthly call credits.

Easy To Use - NodePhone can be totally 'transparent' – you simply make and receive phone calls in the usual way.

- Using our recommended Billion VoIP ADSL router hardware and configurations, you keep using your existing telephone handset.
- Or consider the FRITZ!Box router range – with advanced VoIP capabilities, including an integrated DECT cordless phone base station, answering machine and more.
- Alternatively, the Siemens Gigaset IP/DECT cordless phone system enables NodePhone if you don't have a VoIP router.

Either way, you don't need to turn your computer on to use the phone! Further details available at www.internode.on.net/nodephone/hardware.

Local Numbering - Each NodePhone service is assigned one telephone number. You can choose a number that is 'local' to where you live – from any of the more than 2000 local calling zones across Australia – and your friends can call it just like any other phone number.

Online Toolbox - Conveniently set your Call Forwards, Speed Dials, MultiLine, Call Barring and other features, as well as download your call records, via a simple online user interface.

Quality and Reliability - We've engineered our broadband network to prioritise NodePhone traffic and utilised carrier-grade switches, meaning a consistently high quality experience – every call. And using our recommended hardware means your calls can switch over automatically to a conventional phone line (if you have one), should your Internet connection be unavailable.

Business Options - NodePhone VoIP has some great benefits for business customers too – **MultiLine** gives you the ability to add additional calling capacity online and in minutes. **NodePhone Business Trunks** provide the complete solution for business IP PBX connections, including 100 number indial ranges for direct extension dialling and more. And **NodePhone Hosted PABX** is a complete corporate IP telephony solution 'in the cloud', ideal for multi-site enterprises.

Total Minimum Price

With no setup charges and no early cancellation charges on a NodePhone VoIP service, the total minimum price is simply the monthly rental of the NodePhone VoIP plan that you select!

Call charges (beyond the plan inclusion) are additional and the \$29.95 porting fee applies if you have ported an existing number.

- An administration charge applies if you wish to port a NodePhone number to another provider – full terms and conditions are available online at www.internode.on.net/nodephone
