- An additional once-off \$300 nbn™ New Development charge applies if your premises is identified by nbn™ as being within the site boundary of a new development

About the Service

The NBN service with a Business Pack or Power Pack delivers internet connectivity via the NBN Fibre Network (FTTP, FTTB, FTTN, FTTC and HFC). There are a range of services included, and these are documented at www.internode.on.net/business/nbn

This Critical Information Summary (CIS) covers NBN Fibre (FTTP, FTTB, FTTN, FTTC and HFC) only. CIS for NBN Fixed-Wireless is available separately:

- Business NBN Wireless:
www.internode.on.net/pdf/legal/cis/cis-internodenbn-wireless-business.pdf

For phone services on NBN, a compatible router is required, which may attract additional cost as outlined below, and customers can choose from a range of optional NodePhone VoIP plans. Read more at: www.internode.on.net/business/nbn/phone-services

Minimum Term

Choose from:

- no lock-in (\$99 activation fee), or
- 24 months contract (\$0 activation fee).

Early Cancellation Fees

- No lock-in contract – none. You can cancel at any time.
- 24-month contract – a break fee applies if you cancel your service during the 24 months contract term. This fee covers the costs reasonably incurred by Internode when the contract

Further information: www.internode.on.net/business/internet/nbn/

Information is current as of May 2026, is subject to change without notice and all prices quoted include GST

commenced. The minimum applicable break fee is \$300 if you cancel within the first 6 months. The break fees below apply thereafter:

- 1-6 months tenure: \$300 contract break fee
- 7-12 months tenure: \$225 contract break fee
- 13-18 months tenure: \$150 contract break fee
- 19-24 months tenure: \$100 contract break fee
- Cancelling your broadband service will also cancel any Internode products you've purchased that are only available when bundled with broadband. Should those products have their own contract term, you are liable for their associated break fees.

Availability

This service is available in areas serviced by the nbn[®] (FTTP, FTTB, FTTN, FTTC or HFC). Use our [coverage checker](#) to check nbn[®] availability at your address.

NBN500 Platinum, Superfast and Ultrafast plans are only available in nbn[®] FTTP & nbn[®] HFC areas. NBN100 is only available in nbn[®] FTTN/B/C areas.

Non-standard installations may incur additional fees. An nbn[®] \$300 New Development Charge applies if your premises is identified by nbn[®] as being within the site boundary of a new development.

Required Equipment

You will need an Ethernet router for FTTP services or a VDSL2 capable router for FTTN and FTTB services. If you don't already have a compatible router, Internode can sell you a suitable device at an additional cost.

Changes to your Plan

From time to time, we may make changes to your plan (including the price or inclusions), or we may move you to a new plan (which may cost more, and may have different inclusions). If we consider that the change or move has more than a minor detrimental impact on you, we will give you notice. If you don't like the changes or the new plan, you can cancel your service. If you cancel, you may need to pay for the Modem if it is not returned (see Early Cancellation and Hardware Fees).

NBN Speeds

For FTTN/B/C customers, we will inform you of your maximum attainable line speed once it's available from nbn[®] after activation. If you are on a higher speed nbn[®] plan that your line can't support, we'll provide you with options, including to downgrade or cancel your service for no extra charge and with a refund if cancelling or a credit to your account if downgrading. Actual speeds may vary due to many factors including type/source of content being downloaded, hardware and software configuration, the number of users simultaneously using the network and performance of interconnecting infrastructure not operated by Internode. Devices connected by Wi-Fi may experience slower speeds than those connected by Ethernet cable. More info [here](#).

Speed Tier	Typical Business Speeds*	
	Download speeds	Upload speeds
Standard (NBN25)	25Mbps	8Mbps
Standard Plus (NBN50)	50Mbps	17Mbps
Premium (NBN100)	98Mbps	17Mbps
Premium (NBN500)	500Mbps	42Mbps

Superfast (NBN750)	744Mbps	42Mbps
Ultrafast (NBN1000)	894Mbps	85Mbps

*Typical Business Download Speeds are subject to change and are measured 9am-5pm, Monday to Friday. Typical Business Upload Speeds are estimated by reference to the maximum upload speed. Speeds are not guaranteed and may vary. The nbn® speed tier is the maximum possible download speed that is available outside the busy period .

Excess usage

There are no excess usage charges on these plans

Usage Information

Customers can obtain information on their usage via www.internode.on.net/myinternode

Battery Backup and Power Outages

New ordered services do not include a battery backup. This means you will not be able to access any internet and telephony services provided by NBN during a power outage. This includes making calls to emergency service numbers like 000. Please ensure you have alternate ways of making calls, such as a mobile phone.
