The Total Minimum Cost includes a \$10 SIM charge (includes delivery), plus one month of NodeMobile plan rental.

If you use more than the monthly included calls, texts, or data (or use services that are not included) you will incur charges above the minimum monthly charge.

- NodeMobile features spend management tools - including usage notifications, and sub-limits for transaction types.
- Internode reserves the right to restrict services once monthly billings are greater than \$500.
- Included data quota is counted as the total of downloads plus uploads, and does not cover international roaming.
- Excess data usage above your monthly inclusion will be automatically charged at \$10 per GB (or part thereof). If you exceed your monthly data by 10 GB, we may restrict your data use until the next billing period.

Billing data is not received instantly by Internode after usage has occurred, and can be delayed by 2–3 days. This delay means that spend limits can be out of date by the time they are applied. You remain responsible for charges due to usage beyond the spend limit.

## International Roaming Costs

- Using your mobile phone overseas attracts significantly higher rates than standard NodeMobile charges:
  - All call and data charges while roaming are excluded from your monthly included value amounts.
  - Charges apply to all data sent & received.
  - Charges also apply for both making and receiving calls when roaming overseas.
- While you are roaming overseas, usage details may take days or weeks to reach Internode, meaning you may not receive timely usage warnings. Regardless, you are responsible for all charges made on your service when overseas.
